(a) Does the safety function still fire?
(b) Can the owner still command the system?
TLS only — no secret
TLS only — any broker credential
TLS + ACL — shared credential
TLS + ACL — controller credential
TLS + ACL — device credential
HMAC — any broker credential
HMAC — controller cred. + command key
TLS+ACL+HMAC — device cred. + key (flash dump)
TLS+ACL+HMAC — controller cred. + command key
